

Humanoid Intelligence Report — June 2026

Monthly market intelligence on humanoid capability, deployments, and buyer readiness

Ready For Robots · HEIR 2026 / HEIF · Generated 2026-06-02 · readyforrobots.com/robots

At a glance	
Robots indexed	103
Index leader	Dexmate Vega (77.0)
PoC-or-better (fleet)	54.4%
Commercial / fleet signals	9.7%
Distinct dimension leaders	6

Market overview

Humanoid vendors continue to ship faster hardware and louder demos, while enterprise buyers still ask the same question: who is actually running pilots, with which customers, and on what timeline.

This edition scores 103 humanoids on the HEIF framework (mobility, manipulation, cognition, safety, data pipeline, production) and cross-checks each against public deployment signals — catalog status, estimated commercial deployments, and press coverage where available.

Across the full index, 54.4% show PoC-or-better field evidence and 9.7% show commercial or fleet-scale signals. That gap between "capable on paper" and "proven in operation" is the central story: 0 robots score primarily from specs with little or no deployment corroboration.

Deployment-news scanning has not yet been run for this dataset (or returned no persisted headlines). Customer and trial counts below reflect catalog evidence only — re-run the deployment-news job on the API to enrich press-linked customers before sharing externally.

Month over month

This is the first stored monthly snapshot for month-over-month tracking. Future editions will compare against this baseline.

Key findings

Month over month

This is the first stored monthly snapshot for month-over-month tracking. Future editions will compare against this baseline.

Index leader

Dexmate Vega (Dexmate) tops the composite index at 77 (HEIF 3.1/4), led by manipulation, production, cognition. Scores are inferred from published specs rather than HEIR primary research. Deployment tier: Commercial deployment.

Tight race at the top

Agibot A2 ties or nearly ties the leader on index score (77 vs 77). Differentiate on deployment tier (Commercial deployment vs Commercial deployment) and dimension strengths, not headline index alone.

No single "best" humanoid

6 different robots lead at least one HEIF dimension. Mobility is led by Boston Dynamics Atlas (Boston Dynamics); manipulation by Dexmate Vega (Dexmate). Buyers should short-list by task (locomotion vs dexterous work) rather than a single leaderboard rank.

Capability ahead of proof

5 robots combine HEIF ≥ 2.5 with PoC-or-weaker deployment evidence — including Agibot G5, Tesla Optimus Gen 2, Tesla Optimus Gen 1, Figure 03 and 1 others. These are watch-list platforms for engineering progress, not proven operators yet.

Vendor with broadest deployment footprint

Unitree Robotics leads on combined signals: 2 robots with commercial/fleet evidence, 80 catalog-reported deployments across 3 indexed models (100.0% PoC-or-better).

Deployment-weighted leader differs from index

When HEIF is weighted by logged deployments, Agibot A2 (Agibot (Zhiyuan Robotics)) rises to the top — not Dexmate Vega. Use both rankings: index for engineering potential, deployment-weighted for operational proof.

Customer evidence not yet populated

No named customers were extracted from news in this build. Catalog deployment counts and pilot/commercial tiers still differentiate vendors — run deployment-news persistence to add headline-level customer proof.

HEIR research coverage

16 of 103 indexed vendors use authoritative HEIR 2026 benchmark overrides; the remainder are scored from public datasheets and status fields. Compare like-with-like when benchmarking against the HEIR PDF vendor table.

Competitive dynamics

The market splits into locomotion-first platforms (strong gait, weaker manipulation evidence), manipulation-first systems (dexterity and payload drive value), and AI-first stacks where cognition scores run ahead of production readiness. The dimension-leader table in this report makes that split explicit.

Roughly 45.6% of the fleet still sits at demo-or-research tiers — the index is top-heavy with aspirational capability scores. Discount index rank when deployment tier is "research" or "demo only."

Deployment reality

Among robots with PoC-or-better evidence, about 0.18 also show commercial/fleet-class signals — the funnel from trial to scaled deployment remains narrow.

84 robots report zero catalog commercial deployments; index score alone does not imply installed base.

56 of 103 robots (54.4%) show PoC-or-better public use evidence

10 of 103 (9.7%) have commercial or fleet-scale deployment signals

19 robots report commercial_deployments > 0 (84 at zero)

How to read the rankings

Largest index vs deployment-weighted gap: Fourier GR-3 (index #12 vs deployment #7) — Field-use evidence ranks higher than raw index score.

Top-three index cluster: Dexmate Vega (Commercial deployment); Agibot A2 (Commercial deployment); Agibot G5 (PoC or limited trial). Use deployment tier and catalog deployment counts to break ties when index scores cluster.

Evidence base (full fleet)

Metric	Value
Robots in index	103
PoC-or-better evidence	56 (54.4%)
Commercial / fleet signals	10
Capability-only scoring	0
With news in catalog	0

Index vs deployment-weighted rank

Robot	Index #	Deployment #	Comment
Fourier GR-3	12	7	Field-use evidence ranks higher than raw index score
Dexmate Vega	1	4	Index score outruns public deployment evidence
Noble Machines	6	8	Index score outruns public deployment evidence

Who leads each HEIF dimension

Dimension	Robot	Vendor	HEIF	Index
Mobility	Boston Dynamics Atlas	Boston Dynamics	4.0	100.0
Manipulation	Dexmate Vega	Dexmate	3.5	87.5
Cognition	Figure 02	Figure AI	3.5	87.5
Safety	Noble Machines	Noble Machines	3.5	87.5
Data pipeline	Agibot A2	Agibot (Zhiyuan Robotics)	4.0	100.0

Dimension	Robot	Vendor	HEIF	Index
Production	Tesla Optimus Gen 2	Tesla	4.0	100.0

Top robots — capability vs field evidence

Index score reflects engineering maturity from specs and HEIR research. Deployment tier reflects catalog status, deployment counts, and news. Gap = high HEIF (≥ 2.5) but tier still PoC or weaker.

#	Robot	Index	HEIF	Tier	Depl.	Gap
1	Dexmate Vega	77.0	3.08	Commercial deployment	10	
2	Agibot A2	77.0	3.08	Commercial deployment	20	
3	Agibot G5	77.0	3.08	PoC or limited trial	0	Yes
4	Tesla Optimus Gen 2	75.0	3.0	PoC or limited trial	0	Yes
5	Tesla Optimus Gen 1	75.0	3.0	Demo / trade-show only	0	Yes
6	Noble Machines	73.0	2.92	Active pilot program	5	
7	Deep Robotics DR02	70.8	2.83	Active pilot program	3	
8	Figure 02	68.8	2.75	Active pilot program	5	
9	Figure 03	68.8	2.75	Demo / trade-show only	0	Yes
10	Figure 01	68.8	2.75	Demo / trade-show only	0	Yes
11	Fourier GR-3C Cosmo	68.8	2.75	Active pilot program	5	
12	Fourier GR-3	66.8	2.67	Commercial deployment	10	

Peer comparison — HEIF by dimension (0–4)

Robot	Total	Mobilit	Manipul	Cogniti	Safety	Data pi	Produc
Dexmate Vega	3.08	2.5	3.5	3.0	3.0	3.0	3.5
Agibot A2	3.08	3.0	3.5	3.0	2.0	4.0	3.0

Vendor comparison

Vendor	Models	PoC+	Commercial	Deployments
Unitree Robotics	3	3 (100.0%)	2	80
Engineered Arts	2	2 (100.0%)	2	0
Agibot (Zhiyuan Robotics)	2	2 (100.0%)	1	20
Agility Robotics	2	2 (100.0%)	1	20
Fourier Robotics	2	2 (100.0%)	1	15
UBTECH Robotics	2	2 (100.0%)	1	15
Dexmate	1	1 (100.0%)	1	10
Apptронik	3	1 (33.3%)	1	10
Noble Machines	1	1 (100.0%)	0	5
Figure AI	3	1 (33.3%)	0	5

Buyer guidance

- Short-list 3–5 robots by task fit (mobility vs manipulation vs cognition), then filter by deployment tier $\geq$ pilot.
- Request customer references when tier is PoC or demo-only, even if HEIF scores are high.
- Re-score after vendor spec updates — the live index at readyforrobots.com/robots updates as catalogs change.
- Submit your use case at readyforrobots.com/find-robots for vendor matching against this dataset.

Robot profiles (top ranked)

#1 Dexmate Vega — Dexmate

Index 77.0 · HEIF 3.08/4 · Commercial deployment

Ranks #1 on the live index (77/100, HEIF 3.1/4). Engineering strengths: Manipulation, Production, Cognition. Field evidence: Commercial deployment. 10 commercial deployment(s) in catalog.

#2 Agibot A2 — Agibot (Zhiyuan Robotics)

Index 77.0 · HEIF 3.08/4 · Commercial deployment

Ranks #2 on the live index (77/100, HEIF 3.1/4). Engineering strengths: Data pipeline, Manipulation, Mobility. Field evidence: Commercial deployment. 20 commercial deployment(s) in catalog.

#3 Agibot G5 — Agibot (Zhiyuan Robotics)

Index 77.0 · HEIF 3.08/4 · PoC or limited trial

Ranks #3 on the live index (77/100, HEIF 3.1/4). Engineering strengths: Data pipeline, Manipulation, Mobility. Field evidence: PoC or limited trial.

#4 Tesla Optimus Gen 2 — Tesla

Index 75.0 · HEIF 3.0/4 · PoC or limited trial

Ranks #4 on the live index (75/100, HEIF 3.0/4). Engineering strengths: Production, Data pipeline, Mobility. Field evidence: PoC or limited trial.

#5 Tesla Optimus Gen 1 — Tesla

Index 75.0 · HEIF 3.0/4 · Demo / trade-show only

Ranks #5 on the live index (75/100, HEIF 3.0/4). Engineering strengths: Production, Data pipeline, Mobility. Field evidence: Demo / trade-show only.

#6 Noble Machines — Noble Machines

Index 73.0 · HEIF 2.92/4 · Active pilot program

Ranks #6 on the live index (73/100, HEIF 2.9/4). Engineering strengths: Manipulation, Safety, Mobility. Field evidence: Active pilot program. 5 commercial deployment(s) in catalog.

#7 Deep Robotics DR02 — Deep Robotics

Index 70.8 · HEIF 2.83/4 · Active pilot program

Ranks #7 on the live index (71/100, HEIF 2.8/4). Engineering strengths: Manipulation, Mobility, Cognition. Field evidence: Active pilot program. 3 commercial deployment(s) in catalog.

#8 Figure 02 — Figure AI

Index 68.8 · HEIF 2.75/4 · Active pilot program

Ranks #8 on the live index (69/100, HEIF 2.8/4). Engineering strengths: Cognition, Data pipeline, Manipulation. Field evidence: Active pilot program. 5 commercial deployment(s) in catalog.

#9 Figure 03 — Figure AI

Index 68.8 · HEIF 2.75/4 · Demo / trade-show only

Ranks #9 on the live index (69/100, HEIF 2.8/4). Engineering strengths: Cognition, Data pipeline, Manipulation. Field evidence: Demo / trade-show only.

#10 Figure 01 — Figure AI

Index 68.8 · HEIF 2.75/4 · Demo / trade-show only

Ranks #10 on the live index (69/100, HEIF 2.8/4). Engineering strengths: Cognition, Data pipeline, Manipulation. Field evidence: Demo / trade-show only.

#11 Fourier GR-3C Cosmo — Fourier Robotics

Index 68.8 · HEIF 2.75/4 · Active pilot program

Ranks #11 on the live index (69/100, HEIF 2.8/4). Engineering strengths: Mobility, Manipulation, Cognition. Field evidence: Active pilot program. 5 commercial deployment(s) in catalog.

#12 Fourier GR-3 — Fourier Robotics

Index 66.8 · HEIF 2.67/4 · Commercial deployment

Ranks #12 on the live index (67/100, HEIF 2.7/4). Engineering strengths: Manipulation, Cognition, Safety. Field evidence: Commercial deployment. 10 commercial deployment(s) in catalog.

Methodology

Index scores combine HEIR research benchmarks and inferred specs. PoC/pilot/commercial tiers use status, commercial_deployments, and English/Chinese RSS headlines. Customer names are extracted from headline keyword matching — verify before citing.

Verify customer names and deployment claims before external citation. © Ready For Robots — monthly index update.
